Protecting Health.

## 100 % PHARMA. SANNER. PROTECTING HEALTH.

When it comes to pharmaceutical packaging, there is no room for compromise: Products can only be successful in the market when product safety, production processes and price-performance ratio are right. For this reason, we at Sanner are 100 % Pharma: our clear commitment to the pharmaceutical and healthcare industry is based on 2,000,000,000 units of high-quality plastic packaging produced globally each year. We look back on more than a century of traditional family-run business; a time span that has allowed us to gather profound industry expertise. Our close cooperation with top companies inspires us again and again to create innovative packaging solutions. This brochure invites you to discover what Sanner is all about.

## PHARMA DESICCANT PACKAGING.

For more than 60 years, our focus is on moisture protection.

Pharmaceutical products are developed over the course of years and decades. Sanner makes sure that this investment pays off in the long term and your best ideas do not simply dissolve: with Sanner you can rely on desiccant packaging matched precisely to your product requirements and production processes. As a pioneer and market leader in the field of desiccant packaging, we offer you a broad standard range of complete packaging, closures, capsules and sachets for reliable protection of your products from moisture. Does your packaging require special features? In that case we will develop a customized solution that exactly fits your product.

Protecting Health.

## TESTSTRIP PACKAGING.

**Put our price and performance to the test.** The market for teststrips is growing. Our market leadership in Asia and our strong global presence make Sanner your reliable and experienced partner in teststrip packaging. Our product solutions offer superior quality in large quantities, utmost product safety and a price-performance ratio we like to be measured against – whether you opt for standard products from our catalog or individual teststrip packaging.

## EFFERVESCENT PACKAGING.

For more than 60 years Sanner has been making sure that bubbles are in the glass rather than the package. As the first manufacturer and market leader of desiccant closures, we know exactly what our customers need: excellent workability of packaging on filling lines as well as short and flexible delivery times and fair market prices. Speaking of excellent standards, we prefer to redefine them over and over again. For example with our system solutions that include complete packaging with and without decoration. And all of that accompanied by efficient supply chain concepts.

## PHARMA & MEDICAL PACKAGING.

**For more than 100 years: Engineering made in Germany.**

Many objectives can be achieved with packaging, for instance simplified dosing of pills or branding at point of sale. Sanner is your reliable partner, offering excellent package engineering and product design from a single source. Our holistic development approach focuses on solutions that encompass product requirements, production processes and marketing objectives. Regular risk assessments and seamless documentation ensure that our customers are always on the safe side.

Protecting Health.

## EYE CARE.

**What matters in our eyes: smooth filling processes, sterile liquids and precise dosing.** Play it safe when choosing contact lens and eye drop packaging. Sanner is your established production partner for eye care and offers the best packaging solution for your product. You profit from maximum product safety as a result of our cleanroom production, profound engineering expertise and GMP-compliant production. You can always rely on process-optimized and progressive design – especially when you decide for a customized solution.

Protecting Health.

## READY-TO-FILL SYRINGES.

Plastics expertise meets cleanroom quality. We develop and produce customized solutions for plastic syringes. Thanks to our substantial plastics expertise and our cleanroom production, we are able to offer a high-quality and break-proof alternative to glass syringes; for safe filling operations, safe transportation and safe usage. Even highly complex solutions, such as dual-chamber systems, are in good hands with Sanner.
